The research presented in this PhD thesis was performed in the research group Quantum Interactions and Structural Dynamics (QISD). Up to 31-12-2013 this group was embedded in the Kernfysisch Versneller Institute (KVI) under the name Atomic and Molecular Physics. From 01-01-2014 the group is part of the Zernike Institute for Advanced Materials at the University of Groningen, The Netherlands.

The work was funded by the NWO Dutch Astrochemistry Network. It received additional funding from the COST action CMo805. The beamtimes were allocated by the Helmholtz Zentrum Berlin and financially supported by the European Community's Seventh Framework Programme.

rijksuniversiteit
 groningen

Structural dynamics of PAH molecules upon energetic photon or ion interactions

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

maandag 1 december 2014 om 12.45 uur

door

Geert Reitsma

geboren op 24 maart 1986
te Dongeradeel

ISBN (elektronische versie) : 978-90-367-7332-4

Contents

1	Introduction	7
1.1	Identification and characterization of PAHs in the ISM	9
1.2	Ion processing of PAHs	11
1.2.1	Excitation energy	13
1.2.2	Dissociation dynamics	14
1.3	Hydrogenation of PAHs	17
1.4	X-ray absorption of PAHs	19
1.5	Quantum chemical calculations	21
1.5.1	Interpretation of the experiments	22
1.6	Summary of the contents of this thesis	23
2	Activation energies for fragmentation channels of anthracene di-	
	cations - experiment and theory	27
2.1	Introduction	28
2.2	Experimental and computational approach	29
2.3	Results and discussion	30
2.4	Conclusion	36
3	Ion-PAH collisions: kinetic energy releases for specific fragmenta-	
	tion channels	39
3.1	Introduction	40
3.2	Experimental approach	41
3.3	Results	42
3.4	Discussion	44
3.4.1	Time-of-flight mass spectra and correlation diagrams	44
3.4.2	Kinetic energy releases	49
3.4.3	Reverse barrier calculations	51
3.4.4	Astrophysical context	52
3.5	Conclusion	54
4	De-excitation dynamics of superhydrogenated PAH cations after	
	soft X-ray absorption	59
4.1	Introduction	60
4.2	Experimental	61

4.3	Results and discussion	61
4.4	Conclusion	66
5	Near edge X-ray absorption mass spectrometry on coronene	69
5.1	Introduction	70
5.2	Experimental method	71
5.3	Results and discussion	72
5.3.1	General features of the mass spectra	72
5.3.2	NEXAMS spectra	73
5.3.3	Dehydrogenation and fragmentation dynamics	75
5.3.4	Evaporation model	80
5.4	Conclusion	83
5.5	References	85
6	Femtosecond laser induced ionization and dissociation of gas-phase protonated leucine enkephalin	89
6.1	Introduction	90
6.2	Experiment	91
6.2.1	Mass spectrometer	91
6.2.2	Laser system	92
6.3	Results and discussion	93
6.3.1	Mass spectra	93
6.3.2	Partial ion yields	98
6.3.3	Pump-probe spectroscopy	99
6.4	Conclusion	103
6.5	Acknowledgments	103
6.6	References	103
7	Summary	107
	Nederlandse samenvatting	111
	Dankwoord	117
	Co-authored publications	119
